

Strategic Planning for over all development of Kaliachak College

Strategic Plan is one of the important parts of deciding and executing the activities for the development of any institution or unit. The Kaliachak College has developed a tradition of inclusive pattern of leadership and management to prepare short term and long term strategic plans with the endorsement of suitable stake holders like teachers, administrative staff, student, alumni and social personalities to execute the specific plans. Different committees constituted with the stake holders, eligible in the concerned field, under the president-ship of the principal take the responsibilities to perform the projects allotted them up to the successful completion of the same.

Our college practices to formulate simple, flexible and credible type of strategic plans laying importance on goal and objectives of the institution based on task on time. The planning related to teaching learning and their successful execution are kept in the short term projects whereas the physical infrastructural development which needs huge investment are kept for the long term development.

Our Future Plans

A. Short term Plans:

1. To strengthen the outcome based learning
2. To introduce participative learning system
3. To encourage faculties for quality research and publications
